PROFILE

Computer Science undergraduate with a strong foundation in programming and a keen interest in software testing and web technologies. Eager to apply analytical and problem-solving skills to contribute to real-world projects and grow in a dynamic environment.

EDUCATION

B.Tech Computer Science Engineering PJLCE, Nagpur | 2022 - 2026 | 79% **Class XII (Science) - Physics, Chemistry, Math**

J.N.S Inter College | 2020 - 2021 | 75.3%

Class X

J.N.S Inter College | 2018 - 2019 | 82.2%

PROJECT

PhishNet AI

A browser extension for phishing defence that detects fake or malicious URLs and alerts the user, with a toggle button to activate or deactivate the extension.

- AI-powered detection: Uses machine learning algorithms to identify and flag potential phishing attacks.
- Blockchain-based security: Leverages blockchain technology to provide a secure and decentralized solution for storing and verifying data. **On-Chain Social Network on ICP**

Developed a web-based decentralized application (dApp) on the Internet Computer (ICP) enabling on-chain user profiles, posts, and social interactions using smart contracts.

SKILLS

- Languages: Python (Intermediate), HTML, CSS (Intermediate)
- Databases: MySQL (SQL) - Basic
- Soft Skills: Time Management, Effective Communication, Learning Skill, Problem Solving

TRAININGS & WORKSHOPS

Ethical Hacking (5 Feb'25 - 2 Apr'25)

Introduction to ethical hacking and cyber security, basics of computer networking, basic web attacks, malware, social engineering, and penetration testing & reporting.
